## Language Code List

Language labels and three-letter identifiers are based on the International Statistical Organization ISO-639-3 standard and reflect individual languages whenever possible. Labels that are not ISO-639-3 individual languages are sometimes used for write-ins of a language family (i.e., “Bantu,” “Mixtec”) or geographical area (i.e., “Guatemalan,” “African”) that cannot be coded at the individual language level.

## **Place of Birth, Migration, & Place of Work Code List**

This section contains the numerical list of U.S. States, U.S. Island Areas, foreign countries and other areas. This list was used to assign a three-digit code to birthplaces and state or foreign country of previous residences and places of work reported by each person. The alphabetical list used in coding included abbreviations and alternate names, including some historical names for countries and names of States, provinces, counties, or other subdivisions of countries.

The following list does not include any of these alternate names, but does include continent and area names used as defaults if a specific country was not named but a broader region or area was reported. The names of foreign countries shown on this list and in the publications reflect the most commonly used names for this country, not their official or legal names. Each entry shown on the following list has a unique code.

The U.S. States and U.S. Island Areas were assigned their Federal Information Processing Standards (FIPS) code preceded by a zero. Foreign countries codes were generally assigned by listing the countries or areas in alphabetical order within eight broad continent or regional areas: (1) Europe, (2) Asia, (3) Northern America, (4) Central America, (5) Caribbean, (6) South America, (7) Africa, and (8) Oceania.
